

Full Features Overview From Claude

PROMPT FOR CLAUDE DESIGN:

Design a high-fidelity, multi-screen web application called **Vantage by MEGA** — a gamified member development platform for MEGA (Middle East Growth Academy), a UAE-based mentorship and professional development company. The platform serves two member types: MEGA Mentorship members (on either the Foundations or Breakthrough plan) and MEGA Management members (on either the Essentials or Advanced package). There is also a separate Admin view used exclusively by the MEGA founder to manage members, assign tasks, schedule sessions, and monitor engagement.

BRAND & VISUAL IDENTITY

Primary colors: Sapphire Blue (#0F52BA), Salmon/Coral (#FF6B6B), Teal (#A3E4DB), Near-black (#0A0A0A). Heading font: Bebas Neue. Body font: Montserrat. Sub-heading font: Fira Sans Extra Condensed. The brand feel is high-performance, structured, and aspirational — think a premium productivity tool meets a coaching platform. Clean, minimalist, and modern with purposeful use of color. Not loud or cluttered. White space is used generously. The UI should feel sleek and confidence-inspiring, the kind of platform a driven young professional would be proud to open every day.

Support both light mode and dark mode, with a toggle accessible from the sidebar and the profile section. In light mode, backgrounds are white and off-white. In dark mode, backgrounds shift to deep navy and near-black tones, with the brand colors retained as accents.

The layout uses a persistent left sidebar on desktop and a bottom tab bar on mobile. The sidebar should include the MEGA logo/wordmark at the top, navigation items in the middle, and the user's avatar, name, plan badge, and point total at the bottom. The bottom tab bar on mobile should show icons only with labels, keeping it clean.

NAVIGATION STRUCTURE

Six main sections, accessible from sidebar (desktop) and bottom tabs (mobile):

1. Dashboard
 2. Tasks & Goals
 3. Sessions
 4. Resources
 5. Chat
 6. Profile
-

SCREEN-BY-SCREEN FEATURE BREAKDOWN

1. DASHBOARD

The home screen. Should feel like a mission control view that gives the member everything they need at a glance without overwhelming them. Include the following widgets/modules:

- A warm greeting at the top: "Good morning, [First Name]" with today's date.
- A streak counter showing consecutive weekday logins, displayed as a flame icon with the number of days. Weekends are excluded from streak calculations.
- A points total and current level/rank badge. Levels progress through five tiers: Beginner, Rising, Skilled, Advanced, Elite. Show progress toward the next level as a thin progress bar beneath the badge.
- An upcoming session snapshot card showing the next scheduled 1:1 mentorship call or town hall, including the session title, date, time, and a one-click join button (which links to a Zoom or Google Meet URL). A countdown timer should show time remaining until the session.
- A Pomodoro-style learning timer widget. Members can manually start/stop a focus session, or the platform auto-tracks time spent on the platform. Total learning time is displayed (e.g., "14h 32m this month").
- A progress summary showing four stats in a row: 1:1 Sessions Completed, Modules Completed, Habits Created, Town Halls Attended.

- A task snapshot showing the top three upcoming tasks with due dates and subject area tags.
- A weekly progress chart (simple bar or ring chart) showing activity across the current week.
- An in-app notification bell icon in the top right corner showing unread alerts.

2. TASKS & GOALS

Split into two tabs within the section: Tasks and Goals.

Tasks tab:

- A list view of all tasks assigned to the member by their mentor/admin.
- Each task shows: task title, due date, subject area tag (color-coded from the 13 MEGA subject areas: Professional Communication, Time Management, Growth Mindset, Early Career Development, Personal Branding, CV Development, Project Management, Public Speaking & Presentation, Habit Tracking, Personal Financial Management, Data Management, Strategic Sales, Consulting), and completion status.
- Tasks can be expanded to reveal sub-tasks, each individually checkable. A progress bar rolls up sub-task completion to show overall task progress (e.g., "3 of 5 sub-tasks complete — 60%").
- An effort vs. impact scoring matrix is accessible per task — a 2×2 visual grid (low/high effort on one axis, low/high impact on the other) showing where that task sits.
- Completing a task awards points, shown as a small animated point reward notification (+XP).

Goals tab:

- Members can view goals that have been set (by admin or themselves).
- Each goal shows: goal title, a short description, associated tasks listed beneath it as building blocks, and overall completion percentage rolling up from those tasks.
- The design should make goals feel achievable by visually breaking them down into their component tasks, so a large goal looks like a structured checklist

rather than a monolith.

3. SESSIONS

- A calendar view and a list view toggle.
- Shows all upcoming and past sessions: 1:1 mentorship calls and town halls, clearly differentiated with labels and color coding.
- Each upcoming session card shows: session title, type (1:1 or Town Hall), date, time, mentor name, and a join button with an embedded meeting link.
- A 90-minute pre-session reminder is sent automatically (in-app notification and email).
- Past sessions show a "Completed" badge and, where applicable, notes or resources attached to that session by the admin.
- Members can request a reschedule directly from the session card, which sends a notification to the admin.
- Session attendance contributes to the stats tracked on the Dashboard.

4. RESOURCES HUB

- A clean library interface with folder-based organization. Folders can be organized by topic, subject area, tier, or MEGA product (Mentorship vs. Management).
- Resource types supported: videos (embedded or linked), documents (PDF, etc.), and external links.
- Each resource has a unique shareable deep-link URL that redirects directly to that resource inside the Vantage app.
- A search bar at the top of the Resources section.
- A "Recently Added" section at the top showing the latest uploads.
- Access is role-based: certain resources are only visible to members on specific plans or within specific MEGA Management company accounts. Members only see what they have access to.
- Resources can be tagged by subject area, matching the 13 MEGA subject areas.

5. CHAT

- A messaging interface with two channel types:
 - A global MEGA Mentorship channel: a group broadcast/chat feed visible to all MEGA Mentorship members. Used by the admin for town hall updates, announcements, guest speaker notices, rescheduling alerts, and general MEGA news.
 - Per-company MEGA Management channels: each enterprise client (e.g., Chalhoub, RTA, DAMAC) has its own private channel visible only to members associated with that account. The admin can post in all channels.
- The UI should feel like a clean, professional messaging interface — not WhatsApp-casual, but not overly formal either. Think Slack meets a branded internal tool.
- Unread message badges on the Chat nav item.

6. PROFILE

- Displays the member's personal information: first name, last name, registered email, plan/tier badge (Foundations, Breakthrough, Essentials, or Advanced), and their MEGA product type (Mentorship or Management).
- Members can edit personal information including: interests, hobbies, current role or occupation, whether they are a student or working professional, field of study or industry/department (e.g., Sales, Marketing), and primary subject area focus.
- Shows their cumulative stats: total points, current level, streak record, total learning time, and session history summary.
- Light/dark mode toggle accessible here.
- A settings section for notification preferences (in-app and email toggles).

ADMIN DASHBOARD (SEPARATE VIEW)

A distinct admin interface accessible only to the MEGA founder. Visually differentiated from the member view — use a deeper navy or near-black sidebar to signal the difference. Include:

- A members overview table showing all members, their plan, last active date, points total, streak, and engagement status.
- Ability to click into any individual member's profile to view their full progress, task completion, session history, and engagement metrics.
- A task creation and assignment panel: create tasks with sub-tasks, due dates, effort/impact scores, and subject area tags, then assign to one or multiple members.
- A goals creation panel: create goals, add descriptions, link tasks to goals, and assign to members.
- A session scheduling panel: create 1:1 or town hall sessions, assign to members or broadcast to all, add meeting links, and set the 90-minute reminder trigger.
- A points and level management panel: view each member's point total and manually adjust if needed.
- A resources management panel: upload videos, documents, links, create folders, set access permissions by plan/tier/company account, and generate unique resource links.
- A chat admin panel: post to any channel (global MEGA Mentorship channel or any per-company MEGA Management channel), create new company channels, and manage channel membership.
- An analytics overview: platform-wide engagement stats, most active members, task completion rates, session attendance rates, and streak distribution.

ADDITIONAL FEATURES TO INCLUDE

- A rank/level system with five tiers: Beginner, Rising, Skilled, Advanced, Elite. Members progress through levels by accumulating points from completed tasks, goals, sessions attended, and streak milestones.
- Badges and milestone achievements: e.g., "First 1:1 Completed," "7-Day Streak," "Subject Area Mastered," "First Goal Achieved." Show these in the Profile section as a badge wall.

- An optional opt-in leaderboard visible within the platform, showing top members by points within their product type (Mentorship or Management).
- A weekly progress email digest (referenced in profile notification settings) sent every Monday summarizing the member's streak, points earned that week, tasks completed, and upcoming sessions.
- In-app notification center (bell icon) with two notification types: task assignment alerts and session reminders (90 minutes before). Email notifications mirror these two types and can be toggled on/off in profile settings.

DESIGN DIRECTION SUMMARY

The overall aesthetic is: minimalist, sleek, and modern with a high-performance coaching platform energy. Use Sapphire Blue (#0F52BA) as the primary action color for buttons, active nav states, progress bars, and key data points. Use Coral (#FF6B6B) for alerts, streaks, and gamification highlights. Use Teal (#A3E4DB) for secondary accents, tags, and positive completion states. Near-black (#0A0A0A) for text in light mode; near-white for text in dark mode. Generous white space. Rounded corners on cards. Subtle shadows for depth. Smooth, confidence-inspiring. The member should feel like they are logging into a premium personal development command center every single time.
